Worldwide Birding Adventures

## South Africa

### Eastern South Africa V

*3<sup>rd</sup> to 16<sup>th</sup> December 2011 (14 days)*

### & Cape Extension V

*16<sup>th</sup> to 21<sup>st</sup> December 2011 (6 days)*

*The provinces of KwaZulu-Natal and Mpumalanga on South Africa's eastern seaboard boast some of the country's finest birding and exceptional mammal viewing. An impressive 750 plus species of bird occur in the region reflecting the wonderful natural diversity of the region and this, coupled with a modern infrastructure, well suited to the needs of the modern traveller, makes birding the area a delight. From the classic African savanna of the world-renowned Kruger National Park and the teeming Zululand game reserves to the endemic-rich mist-belt forests of the Natal Midlands and the lofty peaks of the magnificent Drakensberg, this tour of Eastern South Africa offers the very best*

of African birding and game viewing.

Those who decide to do the Cape extension will be treated to a feast of endemics and the remarkable beauty of the South Western Cape. The Mother City, Cape Town, widely considered one of the world's most beautiful cities, will be our base for the first three nights of the extension. From here we will range out to explore the varied ecosystems conveniently accessible from our comfortable base. We will then make our way up the flower-laden West Coast where we will explore the dry country riches of the Tanqua Karoo to round off this unbeatable South African adventure.

### THE TOUR AT A GLANCE...

<b>20<sup>th</sup> December</b>	<b>Ceres and the Tanqua Karoo</b>
<b>21<sup>st</sup> December</b>	<b>Ceres to Cape Town</b>

### THE TOUR IN DETAIL...

**Day 1, 3<sup>rd</sup> December: Johannesburg to Rust-De-Winter.** After morning arrival at Johannesburg International Airport, we transfer northwards to the Rust-De-Winter area. For the remainder of the day we will explore the rich bushveld on the well-known Zaagkuilsdrift road. Included in the bounty of bushveld specials are a host of delightful species typical of the dry west, most of which we are unlikely to encounter elsewhere on tour. Possible highlights include the outrageous Crimson-breasted Shrike, Violet-eared Waxbill, Scaly-feathered Weaver and Red-headed Finch as well as more widespread species like Abdim's Stork, Lesser Spotted Eagle, Gabar Goshawk, Ovambo Sparrowhawk, Purple and European Rollers, Yellow-fronted Tinkerbird, Kalahari Scrub Robin, Marico Flycatcher, Common Whitethroat, Red-backed and Lesser Grey Shrikes, Arrow-marked Babbler, Groundscraper and the recently split Karoo Thrushes, Southern Masked Weaver, Red-billed Buffalo Weaver, White-browed Sparrow Weaver, Cut-throat Finch, Great Sparrow and Cinnamon-breasted Bunting. After a wonderful introduction to South African birding we will travel to our nearby accommodations where we will enjoy a delicious welcome dinner.

**Day 2, 4<sup>th</sup> December: Rust-De-Winter to Kruger National Park.** We will make an early start for some final birding in the Rust-De-Winter area before we continue our journey towards the Kruger National Park. En route to our destination in the park we will make a stop to look for Taita Falcon. Rugged cliff faces, which are home to a resident pair of rare Taita Falcon, dominate this extremely scenic site – certainly the most accessible site for this difficult species. This stake-out may also yield sightings of Cape Vulture, Verreaux's Eagle, White-necked Raven, Mocking Cliff Chat and Striped Pipit.

Thereafter we will transfer to the world-renowned Kruger National Park area, where we will be based for the next three nights.

**Days 3 & 4, 5<sup>th</sup> & 6<sup>th</sup> December: Kruger National Park.** The Greater Kruger conservation area includes vast areas of adjacent Mozambique, and is one of Africa's most famous parks. We will explore the superb road system in an attempt to locate big game, including the legendary "Big 5" - Lion, African Elephant, Leopard, African Buffalo and White Rhinoceros. Kruger will be our best opportunity to watch these spectacular animals in their natural habitat and some of them we will encounter in staggering numbers and at close quarters. Other highly sought-

after animals we have a chance of finding are Cheetah, African Wild Dog, Hippopotamus and a myriad of antelope and other mammals, including Giraffe, Plains Zebra, Blue Wildebeest, Greater Kudu, Impala, Klipspringer, Bushbuck, Warthog, Chacma Baboon, Vervet Monkey and Dwarf Mongoose.

The rich bushveld of the Kruger National Park will provide us with some of the most exciting and rewarding birding of the trip. Of special note here are species requiring vast areas of wilderness, such as Ostrich, Kori Bustard – the world's heaviest flying bird – the incomparable Southern Ground Hornbill, Martial Eagle, Bateleur, Marabou Stork and up to five species of vulture. The park is well known for its diversity of raptors, including those over-wintering from the Palearctic, and we hope to find Lesser Spotted, Tawny and Wahlberg's Eagles, Shikra, Lizard Buzzard and Gabar Goshawk. The bushveld biome is famous for its diversity of birdlife and included in this suite of fantastic birds are Crested Francolin, Swainson's and Natal Spurfowl, Orange-breasted Bushshrike, Violet-backed Starling, African Finfoot, White-crowned Lapwing,

Southern Red-billed, Southern Yellow-billed and African Grey Hornbills, Chestnut-backed Sparrow-Lark, Southern White-crowned and Magpie Shrikes and Red-billed Oxpecker.

We will do at least one night drive in the park to explore for nocturnal birds and mammals. Success on night drives varies greatly, but the list of possibilities is rather impressive and includes the likes of Spotted and Verreaux's Eagle-Owls, Barn, Marsh and Southern White-faced Owls, Pearl-spotted and African Barred Owlets, Square-tailed and Fiery-necked Nightjars, Bronze-winged Courser, both Large and Small Spotted Genets, Lesser and Greater Galagos, African Wild Cat, African Civet, Serval and Spotted Hyena— besides the Big 5!

**Day 5, 7<sup>th</sup> December: Kruger National Park to Wakkerstroom.** We will spend our morning birding around our camp before bidding farewell to the splendours of Kruger. We then move inland to the Highveld once again to the country village of Wakkerstroom for a two-night stay. This quaint village is surrounded by pristine upland grasslands, rich in endemic birds, many of which are currently threatened by the ongoing destruction of their grassland habitat.

We will arrive in time to spend the afternoon birding the highly productive Wakkerstroom marsh at the edge of town, which is a haven for waterbirds and offers the chance of a number of uncommon or localised birds. Purple Heron, South African Shelduck, Cape Shoveler, African Swampphen, South African Cliff Swallow, Levaillant's Cisticola, Lesser Swamp Warbler and Cape Weaver are all regular and, with luck, we may find African Snipe and African Rail. Rarely recorded species seen here on our previous trips include the elusive Baillon's Crake and Red-chested Flufftail.

**Day 6, 8<sup>th</sup> December: Wakkerstroom area.** Driving along the network of dirt roads radiating out from Wakkerstroom, we will explore the grasslands, rocky outcrops and gorges of this unique area in search of Southern Bald Ibis, Blue Crane, endemic Blue and Barrow's Korhaans, Ground Woodpecker, the rare and localised Botha's and Rudd's Larks (the latter considered one of the world's most endangered larks), Pink-billed and the recently split Eastern Long-billed Larks, Mountain Wheatear, Sentinel Rock Thrush, African Rock and Yellow-breasted Pipits, African Pied Starling, Yellow-crowned Bishop, African Quail-Finch and Cape Canary. Red-winged Francolin is fairly common in the moist grasslands and we may find coveys feeding at the roadside or sunning themselves at dawn.

Some of the farms in the area around Wakkerstroom support populations of the peculiar Black Wildebeest (also known by its less-used English name of White-tailed Gnu) and Blesbok, whilst smaller mammals occurring in the grasslands include Yellow Mongoose and the rare Cape Fox. One of the other interesting denizens of these grasslands is the curious Suricate, or Meerkat, immortalised in Walt Disney's 'Lion King'. We have a good chance of finding family groups of these unusual animals.

**Day 7, 9<sup>th</sup> December: Wakkerstroom to Mkuze.** After early morning birding in Wakkerstroom we will drive south to Mkuze, an area in northern Kwazulu-Natal home to a host of exciting specials and a handful of endemics. We will arrive in the mid to late afternoon for a two-night stay.

The Mkuze area is one of the most productive birding hotspots in Southern Africa and, with its wide

variety of savanna, forest and wetland habitats, you can expect an excellent diversity of bird and mammal species in your days here. While we will take time to appreciate the overwhelming number of birds we will concentrate on finding the localised specials, and these include: Eastern Nicator, Bearded Scrub Robin, Stierling's Wren-Warbler, Four-coloured (Gorgeous) Bushshrike and the stunning Pink-throated Twinspot. More widespread but none-the-less spectacular species that we will look for are Black-bellied Bustard, with its strange, "cork-popping" display, the nomadic Senegal Lapwing and the beautiful Narina Trogon.

**Day 8, 10<sup>th</sup> December: Mkuze area.** We will spend the whole day exploring the wonders of the area, searching the great diversity of habitats for species. One of the more exciting habitats for us here is Sand Forest, a rare and localized dry forest severely threatened by development. This habitat is home to Neergaard's Sunbird, Rudd's Apalis, Crested Guineafowl and the strange African Broadbill.

The ephemeral wetlands in the area can be very productive after good rains – depending on the local conditions we may opt for some time at one of these 'pans' where we will search for Black Heron, Lesser Jacana, African Pygmy Goose and White-backed Duck.

While in Mkuze we will be sure to enjoy some 'bushveld' birding – an excellent habitat for raptors and 'flock' birding – here we will be ever vigilant for the huge Crowned and Martial Eagles, Little Sparrowhawk, Grey Penduline Tit, Bushveld Pipit, White-fronted and Little Bee-eaters, White-crested Helmetshrike, Grey-headed and Orange-breasted Bushshrikes and Purple-banded and Marico Sunbirds.

If conditions permit we will do a nightwalk this evening to look for owls, nightjars and small mammals (Greater Galago and White-tailed Mongoose are often seen).

**Day 9, 11<sup>th</sup> December: Mkuze to St Lucia.** After final early morning birding in the Mkuze area, we will make our way back to the main coastal road and down to the village of St. Lucia, nestled on the shores of a lake of the same name and part of a world heritage site. If time allows we will take a drive to the nearby river mouth where we can get great views of Hippopotamus and Nile Crocodile lazing on exposed sandbanks.

**Day 10, 12<sup>th</sup> December: St Lucia and Hluhluwe-Imfolozi Game Reserve.** This morning we will make our way into the dune forest on the edge of St Lucia town - the dunes here are the world's highest vegetated dunes! This rich forest supports an exciting variety of endemics and specials, including the beautiful Livingstone's Turaco, Woodward's Batis, Brown Scrub Robin, Green Twinspot, Red-backed Mannikin and Lemon Dove. Samango Monkey, Red Duiker, Banded Mongoose and Red Forest Squirrel are possible mammal species that we may encounter.

After breakfast we will make our way into Hluhluwe-Imfolozi Game Reserve. The dedicated staff members at Hluhluwe-Imfolozi are credited with saving the White Rhinoceros from extinction and today these primeval-looking animals are regularly encountered here lazing under trees, grazing or indulging in a refreshing mud bath! The rolling hills and verdant woodlands are also home to other familiar species of big game and we may encounter African Elephant, African Buffalo, Black Rhinoceros, Lion, or even Leopard, Cheetah and Wild Dog if we are very lucky. The park's predators support a healthy population of large scavenging birds and we hope to see Lappet-faced and White-headed Vultures, Tawny Eagle and the handsome Bateleur, as well as other raptors such as the unique Secretarybird and two species of snake eagle. Bird flocks are often encountered

and rich with species including Brubru, Crested Barbet, Golden-tailed Woodpecker, Black-backed Puffback, Orange-breasted Bushshrike and Greater Scimitarbill. After a full day exploring the park we will make our way back to St Lucia.

**Day 11, 13<sup>th</sup> December: St Lucia to Hilton via Dlinza Forest and Mtunzini.** Today, we will depart early for Dlinza Forest near Eshowe. The beautiful forest reserve of Dlinza supports an avifauna combining both coastal and mistbelt bird species and we will search for African Goshawk, the rare Eastern Bronze-naped Pigeon, Narina Trogon, Purple-crested Turaco, Crowned and noisy

Trumpeter Hornbills, Square-tailed Drongo, Chorister Robin-Chat, Grey Cuckooshrike and the highly endangered Spotted Ground Thrush. South Africa's only forest canopy walkway is situated here and we will spend most of our morning birding from this superb viewpoint.

Journeying south and then inland we will arrive in the small town of Hilton in the late afternoon. After dinner, there will be an optional night drive to Midmar Game Reserve, famous for its Black Wildebeest. Other animals we should observe include Common Reedbuck, Plains Zebra, Red Hartebeest, Blesbok and, if we are very lucky, Porcupine or Aardvark. The moist grasslands and open marshes of the reserve support a variety of nocturnal birds and we hope to see Marsh Owl, Spotted Eagle-Owl and, if we are fortunate, even the rare

African Grass Owl.

**Day 12, 14<sup>th</sup> December: Hilton to Underberg.** We commence our birding this morning in the Karkloof, a range of forested hills near Howick, home to a number of uncommon and local birds restricted to Afro-montane forests. We will be searching for southern African endemics such as Forest Buzzard, Knysna Turaco, the highly endangered and endemic Cape Parrot, the elusive Bush Blackcap - one of South Africa's most sought-after endemics - Barratt's Warbler, Olive Bushshrike, Sweet Waxbill and Forest Canary, as well as many more widespread yet no less spectacular birds such as African Olive Pigeon, Olive Woodpecker, the uncommon Orange Ground Thrush, White-starred Robin and Yellow-throated Woodland Warbler.

Further up the Karkloof range, we visit a pristine area of upland grassland where breeding Grey Crowned and Blue Cranes and, if we are lucky, Wattled Crane can sometimes be found. Black-winged Lapwing and Cape Longclaw also occur here, but the star bird is undoubtedly the striking Buff-streaked Chat, an endemic wheatear that is breathtaking both in appearance and song. Mammal possibilities include Mountain Reedbuck and the sleek Oribi antelope.

Next we will head for the Richmond area, where we will attempt to track down the stunning Blue Swallow, undoubtedly our most elegant and severely threatened swallow. The birds regularly breed here in the summer months and our chances of finding this rare bird are very good. Continuing on we will pass through the dramatic Umkomaas River valley before arriving at a wonderfully lush patch of Mistbelt forest in the late afternoon. Here we will listen for the high pitched screech of the similarly rare Cape Parrot and attempt to locate flocks as they make their way into the forest to roost. We then wind our way on a scenic country road to the small town of Underberg at the base of the majestic Drakensberg Mountains.

**Day 13, 15<sup>th</sup> December: Day trip to Sani Pass, Lesotho.** Today we travel up into the tiny mountain kingdom of Lesotho in search of a handful of highly localised, highland endemics. In order to do this, we will transfer to 4 x 4 vehicles and make our way up the rugged and spectacular Sani Pass, birding *en route*. The grassy slopes and rocky outcrops on the ascent are home to the bizarre Ground Woodpecker, Cape Rock Thrush and Yellow Bishop, whilst stands of *Protea* bushes support the spectacular, endemic Gurney's Sugarbird (belonging to a family endemic to Southern Africa) and dazzling Malachite and Greater Double-collared Sunbirds. As we approach the crest of the Escarpment, we will be scanning the rocky scree at the roadside for the stunning Drakensberg Rockjumper, African Rock Pipit, Sentinel Rock Thrush and Drakensberg Siskin.

Atop the plateau, the steep slopes and rugged cliffs are replaced by gently undulating terrain and endless vistas of distant, blue mountains. Black Stork and Southern Bald Ibis may be found alongside the mountain streams, whilst Grey-winged Francolin, Red-capped Lark, Sickle-winged Chat, African and Mountain Pipits, Yellow Canary and Cape Bunting prefer adjacent meadows. A

number of birds more typical of the Karoo, such as Grey Tit, Large-billed Lark, Karoo Prinia, Layard's and Fairy Warblers, reach the eastern limits of their range here in the Lesotho highlands. We will keep a careful watch skywards as Cape Vulture, the magnificent Bearded Vulture, Verreaux's Eagle, Jackal Buzzard, Lanner Falcon and White-necked Raven are regularly seen overhead. Other animals of particular interest atop the "Roof of Africa" are the approachable Ice Rat, the endemic Drakensberg Crag Lizard and the colourful Southern Rock Agama.

**Day 14, 16<sup>th</sup> December: Underberg to Durban and onward flight.** Today we depart early for Durban to connect with our onward flights to Johannesburg or to Cape Town if you choose to do the Cape Extension.

## Cape Extension V

### *16<sup>th</sup> to 21<sup>st</sup> December 2011 (6 days)*

**Day 1, 16<sup>th</sup> December: Arrival in Cape Town.** We arrive in Cape Town in the early afternoon and begin our exploration of the picturesque Cape Peninsula at one of the local birding hotspots.

Kirstenbosch Botanical Gardens lies on the slopes of Table Mountain and is home to a plethora of endemics restricted to the Macchia-like *fynbos* vegetation of the southern tip of Africa: Cape Spurfowl scurry across the lawns, the magnificent *Protea* gardens are home to spectacular Cape Sugarbird and Orange-breasted Sunbird, whilst Cape Bulbul, Olive Thrush, the attractive Cape Grassbird, Karoo Prinia, Bokmakierie, Southern Boubou and Southern Double-collared Sunbird may be found in areas of denser cover. We will search for African Goshawk and Rufous-breasted Sparrowhawk that occasionally display above the indigenous forest that cloaks the slopes above the gardens. These forests are also home to African Olive Pigeon, Lemon Dove, Cape Batis and Forest Canary.

**Day 2, 17<sup>th</sup> December: Seabird outing.** The cold upwelling of the Benguela current off Cape Town supports a wealth of pelagic seabirds, with vast concentrations of albatrosses, petrels, shearwaters and prions gathering in the deeper water at the edge of the continental shelf. Birding is excellent year-round and we hope to see Shy, Black-browed and both Yellow-nosed Albatrosses, Southern and Northern Giant Petrels, White-chinned Petrel, Sooty, Great, Manx and Cory's Shearwaters, Wilson's and European Storm Petrels, Cape Gannet and Parasitic Jaeger. If we manage to locate one of the commercial fishing trawlers, the birding can be truly spectacular, with a cloud of seabirds following in the wake of the vessel to feed on the fish offal. Once the excitement has subsided, we will carefully search through the thousands of birds present for rarities such as Wandering Albatross and Spectacled Petrel. Cetaceans are almost always encountered and we have a good chance of seeing Bryde's Whale and Dusky Dolphin. It goes without saying that a day off the Cape is likely to be a highlight of any trip to South Africa. The weather and ocean conditions off the Cape are extremely unpredictable. Our daily schedule will thus remain flexible to optimise our birding on land and at sea and it is not unusual for the pelagic tour to be cancelled as result of bad weather.

Whilst in False Bay we will also visit the famous African Penguin colony, watch for the endemic African Oystercatcher along the adjacent rocky shoreline and scan the offshore islets for their breeding populations of Crowned, Bank and Cape Cormorants.

**Day 3, 18<sup>th</sup> December: The Cape Peninsula.** A diverse array of birding habitats are present around Cape Town and today we will visit a variety of sites, ranging from wetlands to *fynbos* and marine shoreline. We will make our way early to the rugged Hottentots-Holland Mountains, in search of one of South Africa's finest endemics: the handsome Cape Rockjumper. Though strikingly plumaged and conspicuous by their vocalisations, these charismatic birds possess an incredible ability to disappear amongst the boulders and we may have to be patient if we wish to enjoy long sightings of these elusive creatures. Rock outcrops here also support Ground Woodpecker, White-necked Raven, Cape Rock Thrush, Familiar Chat and Long-billed Pipit, whilst the thick mountain *fynbos* is the favoured habitat of Orange-breasted Sunbird, Cape Siskin and the beautiful, endemic Victorin's Warbler. Chacma Baboon is fairly common here, but we will have to scan the rocky ridges carefully for the agile Klipspringer.

After enjoying this spectacle we travel to the Cape of Good Hope Nature Reserve. This wonderful park showcases the most south-western point of the continent and is very popular amongst birders and more general tourists alike. Here we should find the enigmatic Cape Sugarbird and the stunning Orange-breasted Sunbird, both of which are South African endemics, and perhaps the impressive Black Harrier, Grey-winged Francolin, Cape Grassbird and Cape Siskin. We will explore the network of roads to less visited parts of the reserve visiting secluded coves and searching for the elusive Cape Mountain Zebra and Bontebok antelope. In addition, we could also find Eland, the largest antelope in the world. If time allows we will spend the rest of the day at the productive Strandfontein Water Works.

**Day 4, 19<sup>th</sup> December: Cape Town to Ceres via the West Coast National Park.** Our first site of interest today is the West Coast National Park. Large numbers of waders spend the northern winter here and we will check the exposed banks of Langebaan Lagoon for Red Knot, Bar-tailed Godwit, Ruddy Turnstone, Grey Plover, Terek Sandpiper, Greater Sand Plover and Eurasian Curlew, as well as Kittlitz's and the localised Chestnut-banded Plovers. In addition to the shorebirds, these areas also support large numbers of Greater and Lesser Flamingos, South African Shelduck, Cape Shoveler and other waterfowl. The surrounding short, coastal vegetation (*Strandveld*) is home to the endemic Southern Black Korhaan, Grey-winged Francolin, Grey Tit, Cape Penduline Tit, Karoo Lark, Capped Wheatear, Fiscal Flycatcher and the magnificent Black Harrier, surely one of the world's most attractive raptors. In the late afternoon we will make the drive through to the farming village of Ceres, gateway to the Tanqua Karoo.

**Day 5, 20<sup>th</sup> December: Ceres and the Tanqua Karoo.** Just a short drive from the village of Ceres is the semi-arid, central plateau of South Africa known as the Karoo, a land of endless vistas and spectacular sunsets, renowned for its endemic larks, chats and canaries. We leave the famous fruit-growing valley of Ceres before reaching our first stop at Karooport, a narrow canyon that forms the gateway to the Succulent Karoo. Birds inhabiting the arid, rocky slopes and *Acacia*-filled watercourses of this area include White-backed Mousebird, Acacia Pied Barbet, Mountain

Wheatear, Layard's and Chestnut-vented Warblers, the dainty Fairy Warbler and Pirit Batis, whilst the adjacent reedbeds are home to the endemic Namaqua Warbler. One of the area's most charismatic birds is the highly localised Cinnamon-breasted Warbler. Though fairly vocal, this species is highly elusive and seeing it in its habitat of jumbled boulders and rocky scree will require a combination of patience and perseverance.

Continuing northwards onto the open flats of the Karoo, we will watch the roadsides carefully for Karoo and Spike-heeled Larks, Tractrac, Sickle-winged and Karoo Chats, the elusive Karoo Eremomela, Rufous-eared Warbler and Yellow and White-throated Canaries. Pale Chanting Goshawk and Rock Kestrel perch conspicuously on any vantage points and, if we are lucky, we may also find Verreaux's or Booted Eagles or Lanner Falcon. We will also stop to listen for the distinctive flight calls of Namaqua Sandgrouse and the strange, croaking of the Karoo Korhaan, which may help us to locate these cryptically coloured birds. If very fortunate we may see the nomadic Ludwig's Bustard striding through the desolate plains.

**Day 6, 21<sup>st</sup> December: Ceres to Cape Town and depart.** This morning we depart from Ceres for Cape Town International where the tour will conclude.

### Financial Arrangements

The fee for the **Eastern South Africa V** tour is **US\$ 4,675.00** per person sharing and for the **Cape Extension V** is **US\$ 2,050.00** per person sharing.

A single supplement costs for the **Eastern South Africa V** tour and the **Cape Extension V** are **US\$ 395.00** and **US\$ 150.00** respectively and will be charged if you wish to have single accommodation. If RBT cannot provide you with a rooming partner although you choose to share, the single supplement will become applicable. We will make all reasonable efforts to ensure that a rooming partner is found if you do wish to share.

**This includes:**

- All meals from lunch on day 1 to breakfast on day 14 for those on the main tour and from lunch on day 1 to breakfast on day 6 for those on the Cape extension;
- All lodgings;
- Ground transportation;
- The Durban to Cape Town flight for those doing the main tour and the extension;
- Reserve entrance fees;
- Extra activities as mentioned in the itinerary; and
- All guiding services (including tips for local guides and services).

**The tour fee does not include:**

- Visa fees;
- ANY international flights;
- Any drinks;
- Special gratuities; and
- Telephone calls, laundry and other items of a personal nature.

**IMPORTANT: Rates are based upon group tariffs; if the tour does not have sufficient registration (a minimum of 4 paying participants) a small party supplement will have to be charged. Furthermore, these costs are subject to major foreign exchange fluctuations and unforeseen increases in tour related costs and may have to be adjusted as a result. Lastly, we may be forced to change or alter the itinerary at short or no notice due to unforeseen circumstances; please be aware that we will attempt to adhere as close to the original program as possible.**

**Tipping:**

As noted above, gratuities (drivers, hotel staff, porters and restaurants) are included on this tour. However, this does NOT include your Rockjumper leader. If, therefore, you feel that he and/or any local guide/s or other staff have given you very good service, it is entirely appropriate to tip them.

**Special Notes:**

- Much of our time is spent in vehicles, as we do have to cover long distances in order to get to the best areas for birds and animals. The more luggage you pack the less room there is in the vehicle, so it is important for the comfort of your fellow travellers that you do not over-pack. Kindly stick to 20kg for check in luggage and 8kg for hand luggage.
- A related issue is that in all areas that contain potentially dangerous animals, you are confined to the vehicle and are, quite understandably, not allowed to exit.
- Please note that the seas during the pelagic trips off the Cape can be rough and therefore participants who opt for the Cape Extension must be mobile and fit. If you have any medical conditions or physical limitations relating to balance and mobility please do let the RBT office know.
- Crime is problematic in certain areas of South Africa. Exercise caution as you would for any big city where crime exists. Do not unnecessarily flaunt cash and valuables and do not leave valuables exposed in the vehicle.

**Arrival and Departure details:**

This tour **does not** include any international airfares. The tour will depart from OR Tambo International Airport (Johannesburg) on day 1 no later than **9am**; kindly arrive in advance of this time on this day or arrive the day before. Further meeting details in this regard will be forwarded to

you in due course. The tour will conclude by 12 noon at Durban International Airport on day 14. For those doing the Cape extension the tour will conclude by 12 noon on day 6 at Cape Town International airport. If you wish to arrive early and/or depart late and would like assistance in this regard kindly contact the Rockjumper office.

**Flights:**

Johannesburg is the main port of entry for international flights in South Africa and is well serviced by all of the world's major airlines. We have the capacity to advise you on the best route according to your preferences, but your local travel agent will best be able to book these flights for you. If you would like further assistance kindly contact the Rockjumper office, we have a full-time in-house travel consultant that will happily help you plan your route. **However, please DO NOT book your international flights until you have consulted the Rockjumper office for confirmation on the status of the tour.**

**Photos in order of appearance:** Malachite Sunbird (H Chittenden), Lion (J. Rossouw), Bald Ibis (H Chittenden), Pink-throated Twinspot (M. Lilje), Four-coloured Bush-shrike and Narina Trogon, (H Chittenden), Blue Cranes (S Davis), Drakensberg Rockjumper (T. Shall), Orange-breasted Sunbird (J. Wakelin), African Penguins and Black Harrier (M. Lilje), Tanqua-Karoo (J. Pienaar).
